Course Objective:

This is an introductory course for the beginners. It will define crime, criminology, and discuss broad areas or specialized fields within criminology as a multi-disciplinary bio-psycho-social science. It will discuss basic concepts – crime, sin, vice, deviance, anti-social behavior. Measuring crime through police reports, court and prison reports, victim surveys and self-report studies and unraveling why many crimes are not reported to police form another major chunk of this course. Classification of crimes and typologies of criminals will be dealt with in detail. A separate course on the theories of crime is taught later in the undergraduate program.

and Topinard broadly dealt with Lombroso's born criminality approach. Sutherland's definition, Hemmens definition, Siegel's definition, and Hagan's definition of criminology shall be discussed.
